submissions:

25 August 2024

Message from the Guest Editor

Dear Colleagues,

The development of a multitude of biological drugs (TNF- α inhibitors, anti-IL17/23 blockers) and small molecules (e.g., PDE4 inhibitors, TYK2 inhibitors) has led to significant advances in the treatment of psoriasis. These drugs are changing patients' quality of life and they are also helping clinicians to better understand psoriasis's pathophysiology; however, data are still limited on the place in therapy of different drugs in each subpopulation of patients, according to comorbidities, disease severity, and previous exposure to other systemic drugs. Furthermore, the search for biomarkers that might help with classification and therapy selection is still ongoing. In this Special Issue, we will focus on the new upcoming challenges in managing psoriasis, with a particular interest in real-world experiences. The final aim of this Special Issue is to explore all of the efficacy and safety data coming from real-life experiences in or already-published literature (reviews are encouraged) on managing psoriasis with different treatment options.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
