Message from the Guest Editor

In the last 15 years, the advent of biologics has revolutionized the treatment of psoriasis. After the first anti-tnf-alfa drugs, biosimilars are also now available; the anti-interleukin groups (anti-IL-17 and anti-IL-23) are safe and effective treatments for most psoriatic patients, even those with difficult-to-treat body areas.

Furthermore, the management of atopic dermatitis has changed thanks to dupilumab and, subsequently, tralokinumab as well as the inhibitors of Janus kinases. In the near future, many other drugs, both biologics and small molecules, will be marketed for several skin diseases, including vitiligo, alopecia areata, and hidradenitis suppurativa.

In the field of dermato-oncology, immunotherapy and targeted therapies are currently used for difficult-to-treat locally advanced basal cell carcinoma (BCC), squamous cell carcinoma (SCC), and melanoma. Sharing experiences of these treatments will enhance the knowledge and confidence of dermatologists.

For this Special Issue, we expect reviews and original research on new approaches to the diagnosis and management of skin tumors.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
