Message from the Guest Editors

Lung cancer is one of the most frequently diagnosed cancers and the leading cause of cancer-related death worldwide, with an estimated 2.2 million new cases and 1.8 million deaths in 2020. The histological pattern of lung cancer changed significantly over a period of only a few decades, with a decrease in squamous cell carcinoma and a sharp rise in adenocarcinoma. Currently, adenocarcinoma represents the most common histologic type of pulmonary tumors, accounting for more than 65% of all lung cancers. Of interest, it is also the most common form of lung cancer in never smokers.

This Special Issue on the “Advances in the Diagnosis and Treatment of Lung Adenocarcinoma” aims to provide the readers of the *Journal of Clinical Medicine* with concise, high-quality, and up-to-date knowledge, as well as to present unpublished evidence on this topic. It therefore welcomes both reviews and original articles. By discussing the advances in the diagnosis and treatment of lung adenocarcinoma and identifying avenues for future research, this Special Issue will be a valuable resource for researchers, clinicians, and patients alike.

an Open Access Journal by MDPI

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
