### Message from the Guest Editor

Dear Colleagues,

This Special Issue in the Journal of Clinical Medicine (PubMed indexed ISSN 2077-0383) aims to attract high-quality research papers on the etiology, assessment, treatment, and prevention of MP. Research studies on a wide range of physiotherapy methods applied in MP treatment, including exercises, massage, manual therapy, fascial therapy, structural integration, electrotherapy, laser therapy, and other methods of physiotherapy and physical medicine are all within the scope of this Special Issue. We also expect reports on the psychological and other aspects of MP and its therapy. We hope to receive papers on objective methods of examination and assessment of MP as surface electromyography, elastography, algometry, and other subjective methods of MP examination—scales, questionnaires, etc.
