Message from the Guest Editor

Dear Colleagues,

The short-term graft survival rate has improved in the last two decades as the developed preoperative evaluation and established immunosuppressive regimens for kidney transplantation decreased the incidence of rejection and adverse events. However, the long-term graft survival rate after kidney transplantation is similar to that of the previous decade. Immunological, surgical, and medical issues that affect long-term graft survival remain unsolved. A comprehensive approach to resolving these issues is required. Additionally, in living donor kidney transplantation, the long-term risk of end-stage renal disease in living donors is still a major concern. In this Special Issue, we welcome authors to submit papers that can be beneficial for long-term graft survival and for the reduction in end-stage renal disease risk in living donors.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
