Energy-Aware Neuromorphic Hardware

Guest Editors:

Dr. Yu Bai

Dr. Ronald F. DeMara

Dr. Lin Meng

Prof. Dr. Jiliang Zhang

Deadline for manuscript submissions:

closed (20 June 2018)

Message from the Guest Editors

During recent years, researchers throughout academia and industry have been advancing the theory, operation, and applications of neuromorphic computing systems. Recent interest in neuromorphic computing systems stems from its superior and rapidly advancing performance at tasks such as image recognition, learning of complex intelligent behaviors, and large-scale information retrieval problems such as intelligent web search. However, to attain the benefits of neuromorphic computing, high computational and energy-consumption demands of the underlying processing, interconnect, and memory devices on which software-based neuromorphic computing executes has become an intense focus of government, industry, and academic research. Innovative hardware implementations are sought to attain throughput goals within area, security, and energy constraints for orders of magnitude improvements via innovations across the hardware stack. This Special Issue of the JLPEA is dedicated to advances in all aspects of Energy and Secured-Aware Neuromorphic Hardware. We invite original submissions advancing hardware architectures device circuits and neuromorphic computing systems.

Message from the Editor-in-Chief

Journal of Low Power Electronics and Applications (ISSN) 2079-9268) is an open access journal which provides an advanced forum for the studies of electronics for low power applications. A special emphasize is made on ultralow power bio-medical applications. It publishes regular reviews. research papers and short communications

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.2 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the second half of 2023).
