Message from the Guest Editors

Dear Colleagues,

Subthreshold microelectronic circuits are gaining momentum for ultra-low-power applications but their maturity remains low when compared to conventional above-threshold designs. Therefore, this special issue of *JLPEA* is intended to focus on the advances in subthreshold microelectronics with extended versions of papers presented from the 2011 Subthreshold Microelectronics Conference (SubVt 2011) held in Lexington, MA, USA on 26-27 September 2011. However, other works related to ultra-low-power microelectronics not presented at SubVt 2011 will also be considered.

Dr. David Bol

Message from the Editor-in-Chief

Journal of Low Power Electronics and Applications (ISSN 2079-9268) is an open access journal which provides an advanced forum for the studies of electronics for low power applications. A special emphasize is made on ultralow power bio-medical applications. It publishes reviews, regular research papers and short communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.2 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the second half of 2023).
