Message from the Guest Editor

Dear Colleagues,

We are soliciting articles describing genomes, transcriptomes, regulation of transcription and proteomic data relating to the pathogenicity of primary pathogenic fungi and opportunistic fungi. Studies of phylogeny of pathogenic fungi will also fall within the scope of this Special Issue. Data about genes or networks that are associated with pathogenesis and/or dimorphism are of particular interest. Both original data and reviews of published data are appropriate. Human pathogens will be given preference, although fungi that cause disease in other organisms will be considered.

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
