Message from the Guest Editors

In collaboration with Journal of Personalized Medicine (IF: 4.945), in my capacity as Guest Editor I am helping to organize a Special Issue entitled "Personalized Medicine in Otolaryngology: Otology".

This Special Issue on otology aims to give a broad overview of personalized hearing rehabilitation across all ages and indications (very young children, adults, and very old adults), different applications, as well as necessary rehabilitation options. The title is kept broad to cover all aspects of personalized treatment options and their positive impact on a patient's quality of life, from auditory brainstem implants to cochlear implants, bone conduction implants, and middle-ear implants.

In the past several decades, the technology behind all the above-mentioned hearing implants has developed immensely. This Special Issue on otology aims to discuss and broadcast some of the recent achievements and even provide a perspective on future developments in hearing technology.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
