### Message from the Guest Editor

Dear Colleagues,

Risk Management is an important issue for economics and management researchers. Intelligent information processing (IIP) methods can be useful tools for managing and controlling risks. The main topics of IIP are multi-agent systems, automatic reasoning, big data mining, cloud computing, cognitive modeling, computational intelligence, deep learning, evolutionary computation, information retrieval, knowledge-based systems, knowledge engineering, machine learning, natural language processing, neural computing and web intelligence. Risk management based on IIP theory, system, modeling and simulation are hot topics for future research. We encourage researchers, teachers, students, engineers, academicians as well as industrial professionals from all over the world to present their current insights in this special issue.

## Message from the Editor-in-Chief

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an on-line, open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes high quality manuscripts that address theoretical, practical and empirical issues in analysing real life financial data. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, EconBiz, EconLit, RePEc, and other databases.

**Journal Rank:** CiteScore - Q1 (Business, Management and Accounting (miscellaneous))
