Message from the Guest Editor

Dear Colleagues,

Zoo medicine is a vibrant and important science with a considerable role in the continuous improvement of health, welfare, and husbandry of wild animals under human care. It is a challenging and captivating discipline because of the diversity of the patients and their needs, as well for its necessary holistic approach.

Whether they are considered physical, mental, infectious or non-infectious, metabolic, inherited, degenerative, social or self-inflicted, diseases pose a series of challenges to the zoo community and often necessitate the involvement of all animal professionals: keepers, curators, biologists, ethologists, nutritionists and veterinarians.

This Special Issue wishes to celebrate the tremendous contribution of zoo medicine to the continuous improvement of zoo animal management. Original research articles, review articles and short communications on all aspects of current and emerging diseases (aetiology, epidemiology, pathology, diagnosis, treatment, and control) and the resulting improvement in the management of zoo animals are all welcome.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Journal of Zoological and Botanical Gardens, an international, multidisciplinary, peer-reviewed, open-access and open-source scientific journal that covers areas at the intersection of fauna and flora conservation. It publishes reviews, original research papers, short communications and opinion papers, no restriction on the maximum length of the papers. The Journal of Zoological and Botanical Gardens is the first international, peer-reviewed journal that provides an advanced forum for studies on both animals and plants kept in zoos, aquaria, and botanical gardens. It offers a unique opportunity to have the most updated research insights into each individual institution and discipline, but also a chance to treat common issues relating to their missions and aims, responding to the need of a multidisciplinary partnership approach.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus**, **AGRIS**, and **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.7 days after submission; acceptance to publication is undertaken in 6.6 days (median values for papers published in this journal in the first half of 2026).
