Deadline for manuscript  
submissions:

**15 October 2025**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue will welcome manuscripts that link the following themes: The Special Issue (SI) focuses on discussing how to address the issue of land resource misallocation hindering regional sustainable development from resource nexus perspectives. We will discuss the ability of a nexus approach to assess critical interlinkages across the natural resource (water, energy, food, materials and land), along their value chains, and to enable sustainable resource use pathways, in particular with respect to the SDGs on food (SDG 2), water (SDG 6), energy (SDG 7), cities (SDG 11) production and consumption (SDG 12). This provides an opportunity for all scholars to share their knowledge from the multidisciplinary community across the world, including environmental scientist, geographer, ecologist, natural resource scientist. We encourage submissions on the integration of natural resource coupling utilization into land use transformation research, and the land use transformation regulation strategies from the perspectives of water, energy, food, materials, and ecological nexus.

## Editor-in-Chief

### Prof. Dr. Christine Fürst

Institute for Geosciences and  
Geography, Department  
Sustainable Landscape  
Development, University of Halle,  
Von-Seckendorff-Platz 4, 06120  
Halle, Germany

## Message from the Editor-in-Chief

*Land* is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Nature and Landscape Conservation)
