Message from the Guest Editors

We welcome contributions from different areas of study and distinct focal emphasis to highlight the need for better mountain conservation, where legal, social, cultural, and financial frameworks help mountain environments secure their role of provision, regulation, support, and cultural ecosystem services and other benefits. We welcome diverse perspectives from both seasoned and young researchers, those of all gender and educational affiliations, and professional and academic tropes, allowing for the consilient montology of different longitudes, latitudes, and altitudes of the graticule of mountains. With these contributions, we seek to reinforce the membership of the Commission of Mountain Studies of the International Geographical Union that underwrites this effort.
