Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

Dear Colleagues,

Responsible land management is a kind of land management that prepares and assesses interventions in land use, land size, land shapes, land rights, land tenure, and land values in a manner that is (using the 8R model) responsive to needs of the citizens and stakeholders of the land; ensures the resilience of societal and biophysical structures; derives robust solutions in robust institutional structures; and relies on reliable and trustworthy decisions made by respected decision makers. This Special Issue is seeking cases and studies that research any of these responsible land management aspects.

Land management interventions are smart if both the construction of the policy and governance process leading up to a land intervention and the process through which citizens are stakeholders interact with each other are supported by active and passive sensors, social information technologies, new data management systems, systematic algorithms, machine learning, artificial intelligence, and other innovative technologies.

Prof. Dr. Walter T. de Vries

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubAg, AGRIS, GeoRef, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q2 (*Nature and Landscape Conservation*)
