Message from the Guest Editors

Dear Colleagues,

Recent studies argue that we are facing a silent and not so novel socio-environmental crisis. This proposal is based on the evidence and confirms the need to continue the evaluation and research in several key aspects of land, from different approaches and disciplines. I.e. there are some references linked to land and gender, but there are fewer researches about older people and green societies. Therefore, the main aim of this Special Issue - in the context of some Sustainable Development Goals (SDGs) - is to bring together researchers from different fields and open a dialogue regarding some gaps of the land, including ageing and gender relationships.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars. We publish high quality research on societally relevant, emerging and innovative topics and results in land system research. It is now one of the top land journals with a significant impact factor, and has a goal to become the best journal in land in the coming years. I strongly recommend *Land* for your best research publications for a fast dissemination of your research.
