Message from the Guest Editors

We are happy to announce that we will be soliciting abstracts for a Special Issue of Languages on Advances in Syntactic Adaptation.

The purpose of the current Special Issue is to present a collection of major developments in recent years in the study of syntactic adaptation, while presenting a mixture of work on processing, comprehension, production and learning (in children as well as in adults, and in first as well as second language acquisition). We also hope to present a balanced picture in terms of studies that find and do not find evidence for syntactic adaptation, and touch on various linguistic aspects as well as diverse languages and cultures.

We welcome experimental, corpus, and computational works, as well as other relevant methods. We also welcome comprehensive theoretical reviews that put forward a strong case for or against predictive processing as a general framework for understanding syntactic adaptation phenomena. We hope that this Special Issue will provide a clear, comprehensive and varied representation of advances in this area in recent years, in a way that would weave these separate threads into a coherent picture of the state of the art.

an Open Access Journal by MDPI

Message from the Editorial Board

Languages (ISSN 2226-471X) is now in its eighth year since its inception in 2015. It is an Open Access journal which seeks to stimulate debates on key issues in languages and linguistics. We welcome papers at the cutting edge of different fields, ranging from applied linguistics to descriptive and theoretical linguistics. Submissions may consist of research articles and critical reviews as well as proposals for Special Issues where multi-disciplinary approaches and different perspectives on current issues are explored. We invite you to consider *Languages* as a forum for sharing your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), ERIH Plus, and other databases.

Journal Rank: JCR - Q2 (Linguistics) / CiteScore - Q1 (Language and Linguistics)
