### Message from the Guest Editor

Dear Colleagues,

Supply chain sustainability has attained special importance as triple-bottom line issues take center stage in the operations of multi-national companies. This Special Issue will focus on models, cases and examples of reverse logistics strategies that enable sustainability of supply chains.

Authors are cordially invited to submit papers to *Logistics* for this Special Issue. Manuscripts can be submitted on any of the following topics:

1. Supply chain sustainability with a focus on reverse logistics
2. Reverse logistics strategies for enabling sustainability
3. Models of reverse logistics strategies
4. Cases and examples of reverse logistics strategies

We especially welcome real-life applications of reverse logistics strategies in companies.

Assoc. Prof. Dr. Rajesh Piplani
