### Message from the Guest Editors

Dear Colleagues,

This Special Issue is focused on the application of carbon nanomaterials to biomaging and sensing. We aim at gathering contributions from renown researchers in the field to make this issue a reference for all those working in fundamental and applied research on carbon nanomaterials.

We welcome the submission of papers dedicated to the tailoring of the physico-chemical properties of carbon nanomaterials towards application in imaging and sensing in biological media. We want this issue to reflect the plethora of carbon nanomaterials and the diversity of strategies followed to improve their performance.
