## Innovative Biomaterial Solutions for Translational Tissue Engineering and Regenerative Medicine

Guest Editor:

**Prof. Dr. Ziyad S. Haidar**

1. Professor and Director of  
BioMAT<sup>X</sup> R&D&I Group, Scientific  
Director—Research,  
Development and Innovation,  
Faculty of Dentistry, Universidad  
de los Andes, Santiago, Chile  
2. Cross Appointment—  
BioMedicine Doctoral Program,  
Faculty of Medicine, Universidad  
de los Andes, Santiago, Chile

Deadline for manuscript  
submissions:

**closed (31 December 2019)**

### Message from the Guest Editor

It is my privilege to invite you to submit a manuscript for an upcoming Special Issue of *Materials*, entitled “Innovative Biomaterial Solutions for Translational Tissue Engineering and Regenerative Medicine”.

Innovative tissue engineering and regenerative medicine solutions that incorporate nanobiotechnology, advanced biomaterials, computer assistance, three-dimensional printing, and robotic systems offer extensive potential for augmenting and improving the functional and esthetic cranio-maxillo-facial and oro-dental health profile of patients.

Through a collection of original papers, this Special Issue aims to exhibit the latest state-of-the-art in R&D&i ideas, concepts, findings, achievements, and future projections and promote awareness of this rapidly-evolving and enabling multidisciplinary technology, thereby encouraging bridging the gap between medicine, dentistry, pharmacy, material sciences and engineering (including sub-specialities, extending to the head and neck, orthopaedics, oncology, amongst others) for research collaboration across the fields to address the critical and urgent bio-dental/bio-medical concerns.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
