## Harnessing 2D Structures for Next-Generation Sensing and Functional Devices

Guest Editors:

**Dr. Aswin Kumar Anbalagan**

Brookhaven National Laboratory,  
Upton, NY 11973, US

**Prof. Dr. Chih-Hao Lee**

Department of Engineering and  
System Science, National Tsing  
Hua University, Hsinchu 30013,  
Taiwan

Deadline for manuscript  
submissions:

**20 September 2024**

### Message from the Guest Editors

In the realm of nanomaterials, 2D structures have garnered immense attention due to their exceptional properties, such as high surface-to-volume ratios, exceptional electronic behavior, and unique optical characteristics. These attributes make them prime candidates for revolutionizing a wide range of applications, spanning from electronics and photonics to advanced sensors. The essence of this research lies in the ingenious manipulation of 2D materials via innovative doping and irradiation techniques. These techniques hold the key to fine-tuning the electrical, optical, magnetic, and gas-sensing properties of these materials.

This Special Issue aims to elucidate the fundamental principles that govern the behavior of 2D materials when subjected to controlled modifications. The potential benefits are vast, including faster, more sensitive sensors, energy-efficient electronics, and novel devices with applications we are only just beginning to fathom. Review articles that describe the status of their applications are also welcome.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
