Deadline for manuscript submissions:

Message from the Guest Editors

Dear Colleagues,

New era concepts of Internet of things (IoT) and smart surfaces are now demanding transparent, flexible, and nanoscale devices and materials. In this regard, metal oxides have emerged as key materials, since they present good reproducibility, large-area uniformity, and lower fabrication temperatures and costs.

This Special Issue aims to collect original papers and/or review articles focused on the fabrication of metal oxide semiconductors, in both the form of thin films or nanostructures, and their application in electronics.

Relevant topics may include (but are not limited to):

- Metal oxide semiconductors characterization and fabrication;
- Sustainable materials and processes;
- Advances in the integration of metal oxide semiconductor nanostructures;
- Transparent and flexible electronics;
- Electronic devices such as field effect transistors, memristors, sensors, nanogenerators, and photodetectors;
- Application of metal oxide semiconductors to electronic circuits or systems;
- Devices' modelling and simulation.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The iournal covers twenty-five comprehensive biomaterials, energy materials, advanced composites. advanced materials characterization, porous materials, manufacturing processes and systems. nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials. materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
