## Message from the Guest Editors

Dear Colleagues,

This Special Issue on "Auxetic Materials" is dedicated to recent advances in research and development of auxetic materials, as well as other negative materials, including, but not limited to, negative stiffness phases, negative compressibility materials, negative thermal expansion materials, and any other materials that possess interesting counter-intuitive properties. We invite you to submit research articles or reviews on the latest research work in these areas, with emphasis on applications in all areas of science and engineering.
