Message from the Guest Editors

Dear Colleagues,

Research in the field of geopolymers and alkali-activated materials is very active and developing quickly. In the last decade, a great deal has been understood about the chemistry and the microstructure of these materials. Currently, great efforts are being made to develop standardized tests and sustainability assessment to ensure a rapid commercial-scale deployment of these types of materials. This Special issue aims to collect the most recent advances from the global research and development community regarding a deeper comprehension of the structural and microstructural characteristics and the development of standardization and applications.

Claudio Ferone

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
