### Message from the Guest Editor

The extraordinary light-to-heat conversion property of nanomaterials (e.g., magnetic nanoparticles, plasmonic nanoparticles, etc.) can be utilized for realizing a new generation of minimally-invasive therapies for treating cancer and other incurable diseases. Bio-transparent optical radiations (700–900 nm) have been combined with engineered and functionalized nanomaterials for developing the so-called photo-thermal therapies. Both in vitro and in vivo studies have reported flourish achievements, although further research is needed. This Special Issue is devoted to overview both fundamental theories and advanced applications of nanomaterials as efficient nano-source of heat remotely controllable by light. We invite investigators to contribute with review and original papers reporting recent efforts in the field of nanomaterials based photo-thermal therapies.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
