Center of Mathematics and Applications and Department of Mathematics, University of Beira Interior, 6201-001 Covilhã, Portugal

Deadline for manuscript submissions:
closed (31 July 2022)

Message from the Guest Editor

Dear Colleagues,

Rapid advances in modelling research have created new challenges and opportunities for statisticians. Statistical inference in observational studies and many other emerging fields have motivated statisticians world-wide to develop cutting-edge methods and analytical strategies.

The main aim of this Special Issue will be to showcase the applications and methodological research in all fields of computational statistics. This Special Issue will provide a forum for computer scientists, mathematicians, and statisticians working in a variety of areas in statistics, including biometrics, econometrics, data analysis, graphics, and simulation.

The submission for consideration should involve a significant novel methodological, computational, or advanced new methodology in computational mathematics, statistical Inference, engineering, or biology in order to be considered...
