closed (30 June 2022)

Message from the Guest Editor

Dear Colleagues,

Laparoscopic liver resection has been rapidly developed and propagated. Many reports about short-term outcome and oncologic benefit of laparoscopic liver resection for malignant tumors have been published. However, laparoscopic liver resection has not been accepted for standard treatment of hepatectomy because of surgical difficulty and reproducibility. In this Special Issue, we will invite evidences, technical improvement, and expert perspectives of laparoscopic liver resection.

Prof. Dr. Jai Young Cho
