

Glucose Metabolism in Pregnancy

Guest Editor:

Dr. Moen Gunn-Helen

Institute for Molecular
Bioscience, The University of
Queensland, Brisbane, St Lucia,
QLD 4072, Australia

Message from the Guest Editor

In this Special Issue, I sincerely welcome review articles, as well as clinical and original research articles studying glucose metabolism in pregnancy and gestational diabetes. This Special Issue will also be dedicated to the consequences related to gestational diabetes for both mother and child.

Deadline for manuscript
submissions:

20 July 2024

an Open Access Journal by MDPI

2. Formerly Professor of Internal Medicine, School of Specialization of Allergy and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
