Barcelona, Spain

Prof. Dr. Jean-Philippe Ponthot

Department of Aerospace and Mechanical Engineering,
University of Liege, B-4000 Liege,
Belgium

Prof. Dr. Robertt Valente

Department of Mechanical Engineering, Universidade de Aveiro, Aveiro, Portugal

Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editors

Dear Colleagues,

The computational modeling of material forming processes has been a strongly active research field in the last few decades. Significant advances in this field have been made as the result of interdisciplinary multi-physics and multiscale research in related fields of computational mechanics, nonlinear constitutive material models, mathematical analysis, and numerical methods. Additionally, during this period, the industry has shown a growing interest in incorporating numerical techniques as a valuable tool for material design and process optimization.

This SI will collect a set of selected full papers to be presented at the IS organized by the Guest Editors in the upcoming international conferences COUPLED PROBLEMS 2021, to be held in 13-16 June 2021, and COMPLAS 2021, to be held in 7-10 September 2021. A special 30% discount offer will be applied by *Metals* editors to those selected contributions.

On the other hand, this SI is also open to other high-quality contributions by well-known researchers working on the field.

China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **Inspec**, **CAPLUS / SciFinder**, and **other databases**.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
