### Message from the Guest Editors

Dear Colleagues,

Many microfluidic-based medical devices contact blood to diagnose or treat diseases. Therefore, it is critical to understand the hemodynamics within microchannels and the technical challenges that device developers and manufacturers face on the path to commercialization. This Special Issue intends to discuss common flow-related concepts and challenges occurring in microfluidics with biomedical applications. We welcome papers on biomedical topics such as interactions between blood and microfluidic materials, computational fluid dynamics modeling of non-Newtonian flow in microchannels, sample loading, microfluidic pumping and mixing, cell isolation and separation in microchannels, active and passive forces to manipulate blood flow, blood element damage, clotting, microscale leakage testing, bubble formation, transport and filtering of blood using microfluidics, plug-and-play platforms for blood sample analysis, pre-clinical or clinical studies involving microfluidic systems, sensing techniques, hemocompatibility studies in microchannels, and device failure modes.

## Editor-in-Chief

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q2 (*Mechanical Engineering*)
