Micro- and Nano-Systems for Manipulation, Actuation and Sensing, 2nd Edition

Guest Editors:

Dr. Ran Peng

Department of Marine Engineering, Dalian Maritime University, 1 Lingshui Road, Dalian 116026, China

Prof. Dr. Shuaileong Zhang

Beijing Advanced Innovation Center for Intelligent Robots and Systems, School of Mechatronical Engineering, Beijing Institute of Technology, Beijing 100081, China

Deadline for manuscript submissions:

closed (15 May 2024)

Message from the Guest Editors

The precise control, handling, and manipulation of microscale and nanoscale objects including robots, particles, cells, droplets and molecules on micro/nano platforms are essential to the fields of chemistry, biology, robotics, and telecommunications. Micro/nano systems have become powerful tools for tackling some of society's most pressing problems, including healthcare, energy harvesting, and environmental quality. However, challenges must be overcome to expand the practicability of micro/nano systems, such as the stability of assembling, precision of microscale control, compatibility of materials in complex environments, and insufficient driven forces. Accordingly, this Special Issue seeks to showcase research papers, short communications, and review articles that focus on: (1) the novel design, modeling, fabrication, and assembling of micro/nano-scale systems for small object manipulation, control and actuation based on, but not limited to, magnetic, electric, thermal, acoustic, light; (2) multiphysics-driven intelligent microrobots, actuators and sensors; (3) applications of newly designed microfluid and nanofluidic systems for fluid control and sensing.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q2 (*Mechanical Engineering*)
