Dr. Manuel Becerra

Grupo EXPRELA, Centro de Investigaci3n Cientificas Avanzadas (CICA), Departamento de Bioloxia, Facultade de Ciencias, Universidade da Coru2a, 15071 A Corunna, Spain

Deadline for manuscript submissions:

31 May 2024

Message from the Guest Editors

Yeasts are eukaryotic unicellular microorganisms of the fungi kingdom that have served mankind since ancient times.

The aim of this Special Issue is to provide a multidisciplinary space to share valuable information about recent research (basic and applied) on yeasts and using yeasts as tools, from the genome to the proteins (native and recombinant) and other bioproducts. Studies of *S. cerevisiae* and non-conventional yeasts are both welcome, as well as articles about the history of yeast research.

As Guest Editors of this Special Issue, we invite you to submit research articles, review articles, and short communications related to recent advances in yeast research.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
