Department, University of  
Insubria, Varese, Italy
2. UNICAM, Camerino University,  
Camerino, Italy
3. Scientific Department, Velleja  
Research, Piacenza, Italy

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editor

This Special Issue aims to provide an up-to-date and comprehensive overview of the state of the art of gut microbiota in Italy.

We encourage Italian researchers from related fields to contribute papers highlighting the latest developments in gut microbiota, or to invite relevant experts and colleagues to do so. This Special Issue will publish full research articles and comprehensive reviews. The covered topics of interest include but are not limited to the following:

- Structure and function of the microbiota;
- Microbial community genetics, transcriptomics, proteomics and metabolomics;
- Interactions within the microbiota;
- Metabolic interactions with the host;
- Inflammatory diseases;
- Interactions with the immune system;
- Microbial biodegradation of nutrients and xenobiotics;
- Microbial ecology;
- Microbial functions in the different habitats within the gut;
- Metabolic flux analysis;
- Analysis of functionalities via stable isotope probing (DNA, RNA and protein);
- Model systems for studying microbiome biology;
- Novel technologies for the analysis of the structure and function of the microbiota.

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
