Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Microorganisms* will include articles concerning pathogens that can be transmitted among different species and which should be viewed under the ‘One Health’ approach. Submissions can refer to the causal agents of such problems, as well as to all aspects of the relevant diseases: diagnosis, pathogenesis, transmission, epidemiology and molecular epidemiology, surveillance and control and may include studies performed in people and/or animals describing original field, laboratory or experimental work. Systematic or opinionated reviews are also welcome.

Prof. Dr. Charalambos Billinis

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
