Deadline for manuscript  
submissions:

**31 July 2024**

### Message from the Guest Editors

Dear Colleagues,

Natural compounds originating from plants, animals and minerals exhibit different biological and pharmacological properties. Some, especially those with significant activity, could serve as potential antioxidant and antiaging drugs to combat against free radicals. The formation of oxidative stress is an integral part of cell life and responsible for premature aging processes as well as cellular damage leading to the development of cancer. Currently, finding safe compounds of natural origin that have therapeutic potential for preventing or treating diseases presents a serious challenge.

This Special Issue aims to collect scientific papers concerning studies on the antioxidant, antiaging and anticancer activities of natural compounds or products. Studies on their possible mechanisms of biological action in normal and cancer cells, their effect on the skin, the chemistry of active natural compounds and any other relevant topics are of interest.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
