Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Molecules* is dedicated to recent advances in applied chemistry and mainly comprises a selection of exclusive papers by the Editorial Board Members (EBMs) of the Applied Chemistry Section. While contributions from other authors will also be considered, this issue focuses primarily on highlighting recent interesting investigations conducted in the laboratories of our section's EBMs, providing an attractive open-access publishing platform for applied chemistry research data.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
