Dr. Dimitrios Giannakoudakis

Department Chemistry, Aristotle
University of Thessaloniki, 54124
Thessaloniki, Greece

Message from the Guest Editors

This Special Issue aims to contribute towards the search for new methods beyond sorption, biodegradation and catalytic degradation and to present new materials for effective (waste)water treatment and purification.

We especially welcome works that address emerging pollutants or compounds that are not broadly studied. We encourage the publication of scientific articles, critical reviews, and case studies relevant to the context outlined above, and which generally fall within the field of modern environmental remediation applications.

Deadline for manuscript
submissions:

31 October 2024

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
