Message from the Guest Editor

Dear Colleagues,

From the various parts of medicinal plants, such as flowers, fruits, leaves, and roots, bioactive compounds are purified and characterized. These natural compounds have been used as crude drugs in traditional medicine in Asia, including China, Japan (Kampo medicine), India (Ayurveda), and Indonesia (Jamu). In crude drugs, there are major constituents, which are included at a high content, and principal constituents, which exhibit pharmacological activities. Although the latter function in vitro and in vivo (animals and humans), they are not well elucidated. This Special Issue covers research on the natural bioactive compounds that are included in crude drugs of traditional medicine. This includes both structural and functional analyses of the constituents, including major constituents and principal constituents, especially in Kampo medicine and Jamu.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
