### Message from the Guest Editors

The present Special Issue is open to contributions in the field of micro/nanoencapsulation, emulsion-based processes, particulate systems, or other relevant encapsulation strategies, directed at solving any constraint related with the direct use of natural ingredients or intended to achieve target or controlled release. Moreover, it targets applications in different industrial fields, e.g., cosmetics, textiles, food, biotechnology, and the chemical industry, among others. The focus on achieving high-volume production and continuous processes to reach an industrial scale, and the use of green principles together with the integration of bio-residues in the developed processes is welcome.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
