Technology, National Taiwan
University, No.1, Sec.4, Roosevelt
Road, Taipei 10617, Taiwan

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Cancer and cancer-related diseases are multifactorial and the pursuit of cancer therapeutic targets and drug discovery is neverending. However, cancer drug use is always accompanied by side-effects and it is an aspiration to “make cancers preventable”. Phytochemicals are a befitting selection among suitable choices with lower costs, multiple sources, most importantly, less or no side-effects. Phytochemicals are powerful and some of them have reported effectiveness against various diseases in preclinical, clinical, and epidemiological research. The Special Issue focuses on the involvement of phytochemicals in the prevention and therapeutic action of cancer. There is no limitation concerning the choice of cancer type or phytochemical, in terms of sources or classifications, as long as the criteria is met. Studies focusing on phytochemicals identification, modification, application, and strategies, including their safety, efficacy, and underlying molecular mechanisms and targets for cancer prevention and therapy are also welcome.

an Open Access Journal by MDPI

Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
