Isolation, Synthesis and Biological Activity of Polysaccharides

Guest Editors:

Dr. Peng Lei

College of Food Science and Light Industry, Nanjing Tech University, Nanjing, China

Prof. Dr. Sha Li

State Key Laboratory of Materials-Oriented Chemical Engineering, College of Food Science and Light Industry, Nanjing Tech University, Nanjing 211816, China

Deadline for manuscript submissions: **30 June 2024**

Message from the Guest Editors

Dear Colleagues,

Polysaccharides, natural macromolecular polymers found in plants, animals, algae, and microbes, have drawn interest owing to their functionalities. Polysaccharide is a fundamental chemical involved in the metabolism of living creatures, as well as a structural support and energy storage material for cells. It is involved in cell identification and control, cellular biological information transport and transmission, immunological response, and protein transfer.

This Special Issue will collect manuscripts on the isolation, modification, biosynthetic process, biological activity, and structure–activity relationships of polysaccharides, as well as oligosaccharides.

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
