The editorial board of *Molecules* (IF: 4.6, ISSN 1420-3049) invites you to submit an article or review to a Special Issue entitled "Bioactive Molecules Targeting Inflammation Processes in Related Diseases—2nd Edition".

This Special Issue will accept reviews or original research papers focused on the *in vivo* or *in vitro* evaluation of anti-inflammatory bioactive molecules of natural origin that could be used as potential therapeutic agents in controlling the inflammatory processes encountered in various chronic diseases. The aim is to decipher the molecular mechanisms involved in these processes, improve knowledge in the field, and discover potential drug candidates that could positively impact the evolution of chronic diseases.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
