Message from the Guest Editor

Dear Colleagues,

Nowadays, sustainable development has been accepted as common knowledge by society. Under this background, the applications of cheap metal salts for use as catalysts in organic synthesis are becoming more and more important and attractive due to their advantages, such as they have low costs, are less-toxic, are biocompatible, environmental benign, etc. Taking all these parameters into consideration, this Special Issue will focus on the applications of base metals as catalysts in organic synthesis. All contributions on this topic are encouraged.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
