Message from the Guest Editor

Dear Colleagues,

Cancer is a leading cause of death world-wide. Treatment of cancer is more difficult if cancer cells are metastasized to distant parts of the body. Current available treatment options are not sufficient to save lives, therefore alternative innovative strategies are required to prevent or treat the disease. Chemoprevention of cancer seems to be the best strategy or approach to protect from this disease and increase the span of healthy life in human beings. The approach may include regular intake of phytochemicals, dietary or non-dietary, which are non-toxic in nature but have potent anti-carcinogenic properties.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
