Determination of Trace Heavy Metals and Metalloids in Environmental Samples

Guest Editors: Message from the Guest Editors Prof. Dr. Giuseppe Scarponi Dear Colleagues, This Special Issue has the broad scope to provide an Prof. Dr. Silvia Illuminati overview of current trends in analytical methods to Prof. Dr. Anna Annibaldi determine heavy metal(loid)s in environmental matrices. Contributions are expected to include fundamental studies Prof. Dr. Cristina Truzzi referred to set up of specific analytical methods, as well as real-case multidisciplinary investigations. Applications extend to extreme environments (such as Polar Regions, Deadline for manuscript high altitude lands, deserts, stratosphere, ocean depths submissions. and floors), to inaccessible sites (using unmanned closed (30 June 2020) vehicles), to all kinds of biota, to humans, to food and beverage, etc. In addition to "heavy" metal(loid)s, we

Prof. Dr. Giuseppe Scarponi Prof. Dr. Cristina Truzzi Prof Dr Anna Annibaldi Prof. Dr. Silvia Illuminati Guest Editors

individually articles.

expect that authors will add also other major and minor constituents, and also limited organic compounds, to give full characterization of matrices, when appropriate for the completeness of the study reported. Studies

All papers will be published individually as soon as they are accepted, which ensures very fast publication speed for

environmental chemometrics are also welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
