Deadline for manuscript submissions:
closed (20 September 2013)

Message from the Guest Editor

Dear Colleagues,

Frank Westheimer once proclaimed that it is as if "mother nature has provided us with enzymes as a tool to teach physical-organic chemistry to scientists". Thus far we have mastered only a minute part of her course. Our purpose in this special issue is to mark our current state in this endeavor. While our focus will be centered on the chemistry of the phenomenon, we will interpret that viewpoint quite broadly. A second objective of this issue is to take advantage ocf the ease of access to a broad audience provided by this journal's policy and thus provide our colleagues a in related fields with a view of the various experimental and theoretical approaches available to today's enzyme chemists.

Dr. Harvey F. Fisher

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
