Deadline for manuscript
submissions:

closed (31 July 2019)

Message from the Guest Editor

Dear Colleagues,

After the great successes of the 2014 and 2016 Special Issues on “Enzyme Immobilization”, this year we will launch a new edition with a small modification, “Enzyme Immobilization and Its Applications”. Thus, together to special emphasis on the development of new enzyme immobilization supports and/or protocols and the use of genetic, the development of new techniques for immobilized enzyme characterization, chemical or physical modification to enhance the enzyme performance after immobilization, this year we widen the focus to the use of immobilized enzymes where immobilization may play a key role. Special interest will be on enzyme coimmobilization and cascade reaction, as well as the use of nanomaterials to modify large or insoluble substrates. Both review and research papers will be welcome.

Prof. Dr. Roberto Fernandez-Lafuente

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
