Message from the Guest Editor

Dear Colleagues,

For the past few decades, herbal medicinal products have proven their efficacy at curing or attenuating symptoms of many chronic diseases, such as metabolic disorder (diabetes, hypercholesterolemia, hyperlipidemia, steatosis), auto-immune diseases (lupus, rheumatoid arthritis), inflammation diseases (inflammatory bowel disease, colitis), and degenerative diseases (arthritis, Parkinson's disease, Alzheimer's disease). These herbal medicinal products, including pure compounds, extracts, and decoctions, ameliorate disease progression through many characteristics, such as inflammatory modulators, insulin sensitizers, and homeostatic keepers. This Special Issue hopes to comprehensively highlight the newest discoveries in herbal medicinal products for treating or attenuating symptoms of chronic diseases, especially herbal medicinal products as adjuvants for current treatments, side effect attenuators, or synergy toward current medicines. Additionally, studies that debate herbal-herbal interactions and herbal-drug are welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
