Message from the Guest Editors

Dear Colleagues,

We are delighted to announce the Special Issue of *Molecules* dedicated to “Materials Chemistry in France”. This issue aims to highlight the latest advances in the field with a special focus on the synthesis of multifunctional organic, inorganic, or hybrid materials and metamaterials manufactured by processes that minimize resource consumption and optimize waste disposal. New insights into characterization techniques, properties, and applications in our daily life, in the field of additive manufacturing, bioengineering, environment, and energy, to name a few, are invited.

Manuscript within this scope can be research articles, review articles, as well as short communications.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
