Message from the Guest Editors

Natural products are playing stable and growing roles in human and veterinary medicine, in food and the cosmetic industry and in other, increasing numbers of fields. Their importance is based i.a. on the fact that they are mostly bound to renewable sources, which in fact makes them valuable within a circular economy, i.a. However, natural products gave an origin of stereochemistry, regioselectivity, chirality, and many other features and disciplines within science, development, and industry in a scope which is indispensable.

This Special Issue aims to underline current developments in all fields that are connected to natural products.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
