Deadline for manuscript  
submissions:

**closed (31 August 2016)**

### Message from the Guest Editor

Dear Colleagues,

Memory devices with organic or organic/nano hybrid materials have many unique advantages, such as low fabrication cost and high mechanical flexibility. They are regarded as next-generation memory devices. Great progress has been made in the development and understanding of organic memory devices. This Special Issue aims to provide a forum for the dissemination of the latest information on the materials, device fabrication, and mechanism of organic memory devices.

Prof. Dr. Jianyong Ouyang

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
